About WorldExtend

Application Delivery Made Easy

The WorldExtend IronDoor Application Cloud is your all-in-one solution for application delivery and secure remote access. It comes preloaded with the software needed to deploy your needed applications and is ready to securely deliver your applications, desktops, routers, data and VNC devices right out of the box.

Benefits For You

- **Less Maintenance to Workstations**
- **Secure Remote Access to Resources from Anywhere**
- **Centralize data keeping it secure and easier to backup**
- **Centralize applications and make them easier to manage**
- **Deploy applications, and other network resources remotely and securely.**
- **Increase productivity, decrease problems by keeping data and applications in a central location.**

Key Features

Simple Setup

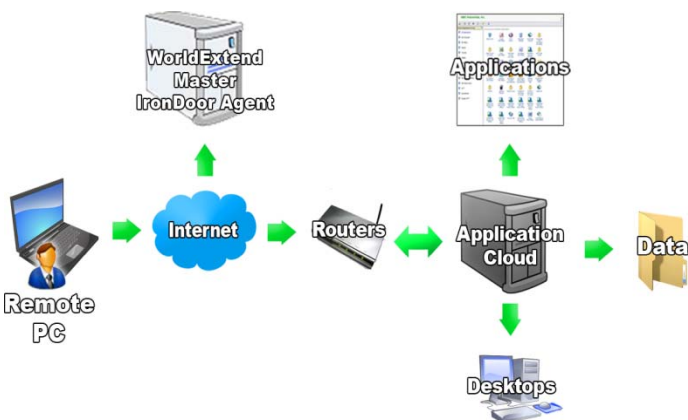

Preloaded and preconfigured to deploy to deliver your resources, WorldExtend IronDoor Application Cloud is ready to deploy your applications right out of the box. Simply plug into your network and install your needed applications.

Using Your WorldExtend IronDoor Application Cloud

Using your WorldExtend IronDoor Application Cloud is easy. All your resources can be access through a easy to use web-based Launchpad, which can be accessed from anywhere.

Access All Your Network Resources

Your WorldExtend IronDoor Application Cloud enables you to remotely access your desktops, applications, servers, file shares, printers, VNC machines, routers, and other network resources remotely through a very simple web based application portal.

Application Delivery Made Easy

Aimed at those that do not have an application server, application delivery system or are in search of another alternative to other solutions, the WorldExtend IronDoor Application Cloud delivers. One product can serve applications to a few or many users applications regardless of location or connection without any loss in features or productivity!

Keep Data Centralized

Not only can the WorldExtend help you with Application Delivery, but it can also help with data centralization. Keep data secure by configuring your WorldExtend IronDoor Application Cloud as a file server, allowing you to deliver what your workforce needs no matter when or where they need it.

High Performance

The WorldExtend IronDoor Application Cloud is built on powerful Intel Xeon processors, ensuring a high performance and highly reliable system.

Security

Using WorldExtend's advanced security process, your data is kept secure. Your users are authorized through our WorldExtend Master IronDoor Agent or if you so choose you can host your own Master IronDoor Agent and authorize your users. In addition WorldExtend's Application Cloud features 128bit or 256bit SSL encryption and our patent pending Ø-Port and Ø-Listener technologies allowing you to keep your data secure from cybervandels, hackers and many other security threats.

When You Need Us, We're There

The WorldExtend IronDoor Application Cloud features a 3 Year Warranty to help protect you from unexpected failures or mishaps. In addition support staff are always happy to help with your questions.
